From Our President and Co-Founder

Dear friends,

More than 28 years ago, a group of us came together with one goal in mind: to pool our resources in order to improve the lives of children. We developed a set of shared values that gave us purpose:

Our roots. We knew that children in India were experiencing a tremendous need for basic support in nutrition, health and education, and we wanted to give of our strengths to help.

Compassion. We believe that every child deserves kindness and understanding—a belief that helps us choose the projects and partners with the greatest potential impact in the lives of those in need.

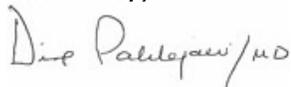

Hope. We have faith that tomorrow holds a better future. By standing in solidarity with children in need, we know our contribution can help create a brighter tomorrow.

Now, 28 years later, those core concepts continue to guide every step we take.

This year, health and economic emergencies have rocked the globe. But, the resilience and innovation with which our team responded has also restored our hope for tomorrow. As the pandemic unfolded in early March, we came together to deploy rapid emergency relief to those in need—reaching children and families, and ensuring that education, nutritional and medical support remained constant. Finally, the pandemic gave us the opportunity to see areas in our programs that could be strengthened to prepare for a better year ahead—whether by distributing devices to children or by increasing our mental health supports.

On behalf of CHI's board and founders, I invite you, as you read through this report, to let these stories bring you hope for a better tomorrow.

Sincerely,

Dina Pahlajani, M.D.
President & Co-Founder

**Children's Hope

care and career
building**

From Our Executive Director

Dear friends,

Many years ago, when the late Christopher Reeve was asked what makes Superman, he said, “a hero is an ordinary individual who finds the strength to persevere and endure in spite of overwhelming obstacles.”

I have been reminded many times of this quote over the past year. Like the little boy pictured here, children everywhere have been forced to adapt to a new world.

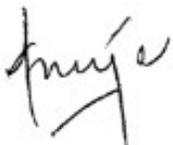

But the children we serve—from slums to rural villages and camps—have been challenged to access even the most basic necessities. Children were asked to connect with their teachers and schools even if their families shared just one mobile phone. Day laborers were forced to choose between defying lockdowns and hunger. And marginalized families across our programs faced increased stress, anxiety, depression and other mental health concerns.

Calling on the strength, compassion, and generosity of our community, CHI was able to step in and help

- Deploying more than 900,000 meals, serving more than 53,000 with medical teams, and making nearly 125,000 hours of counseling possible;
- Activating student learning through more than 310,000 remote learning sessions; and
- Empowering communities with nearly 44,000 PPE donations and mask making units.

This report captures all of our efforts this year; but more importantly, I hope it also captures the inspiring stories of the everyday heroes in our programs--who despite great odds, found strength and perseverance.

Sincerely,

Executive Director

How We Work: Supporting the Whole Child

Children's Hope India's
Whole Child approach takes
a holistic view of education.

Our approach is based on **research around child development**, including:

Strong nutrition leads to higher achievement. Studies show that malnutrition and low BMI correlate with school absences and dropping out. Meanwhile, nutritional interventions improve a child's cognitive functions, and result in higher test scores.

Adequate medical care correlates to better performance. Children with limited or no access to healthcare experience higher rates of untreated and preventable illnesses, decreased IQ, and longer absences. Yet, students with access to adequate healthcare have consistently performed better in school.

Mental health support sustains long-term educational increases. Research shows that mental health issues lead to school avoidance, dropping out, and underemployment. While students who received mental health support show sustained improvements in academic achievement.

Over the past 28 years, this approach has consistently led to higher student achievement with at least 98% of students passing, a rate well above the national average.

Program Support CHI Provides

Advisory

Regular communication to help overcome challenges and solve problems as they arise

Grants

Flexible cash investments in programs, staff and operations

Best Practices

Access to best practices and implementation strategies proven in program areas

Collective Action

Research-based theory of change to drive shared mission and impact in marginalized communities

Peer Networks

Connection to like-minded peers for knowledge exchange and partnership

Evaluation

Simple, effective evaluation and reporting to understand impact and identify opportunities

Engaged Board

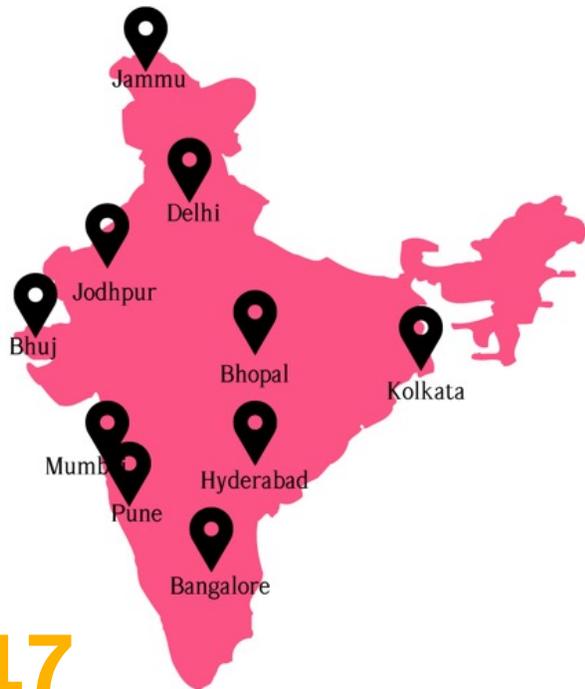

Executive board members provide expert guidance to partners

Low Overhead

Prudent management and lean operations mean more funding to programs

CHI Global Footprint

COVID-19 Response

COVID-19: Our Response To Date

A Comprehensive Relief Program. The global health crisis created by the COVID-19 outbreak has taken center stage since early 2020. Calling on the compassion and generosity of our CHI community, we launched the COVID Relief Program in early March to survey on-the-ground needs and quickly deploy our resources to fill those gaps.

Across the communities where CHI works, lockdowns, unemployment, and financial strains increased food insecurity and scarcity. CHI responded with a comprehensive meal and supply distribution program that brought food, sanitizers, masks and other PPE to beneficiaries. At the same time, recognizing the need for digital learning devices and training, we doubled efforts to make remote learning possible for all students.

Challenges

Solutions

Limited access to critical supplies and personal protective gear

Donated soaps, sanitizers, gloves and masks, and mask-making units

Food insecurity and malnutrition due to lost income, strict lockdown

Comprehensive hunger relief program of ration kits, hot meals, and food deliveries

Lack of connectivity, devices and teaching capacity for digital learning

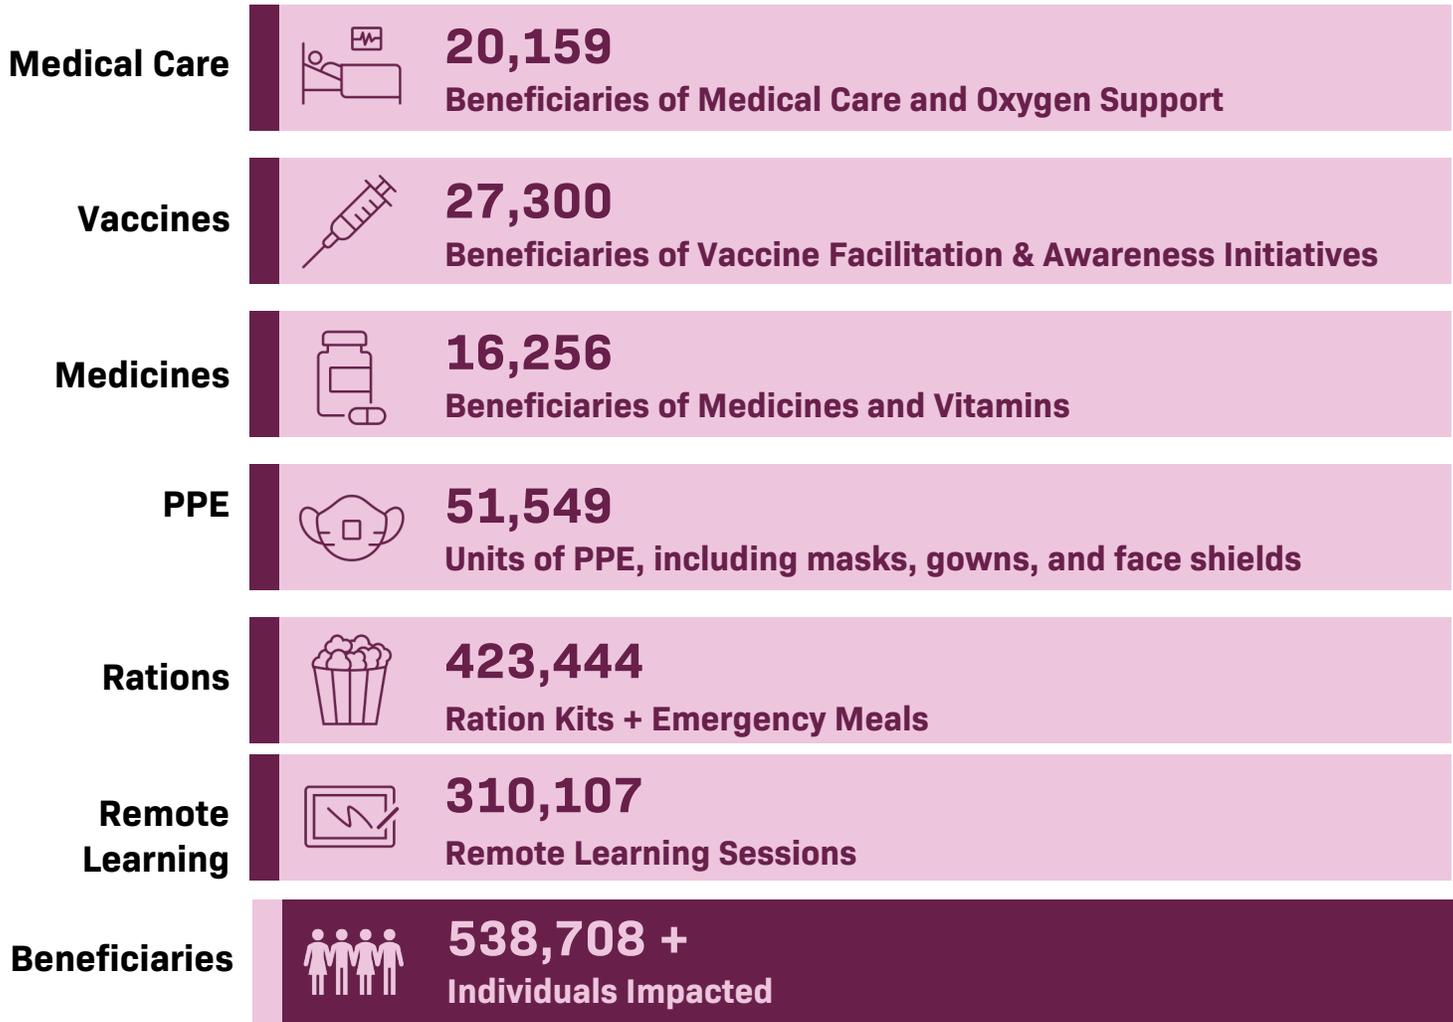

Donated data packs, WIFI, digital and learning devices, and teacher training

A serious mental health crisis for children, worsened by the pandemic

New innovative counseling, resources, and wellness activities

COVID-19: Our Response To Date

July 2021. Now, three months into the devastating Second Wave, India continues to report tens of thousands of infections and more than 1,000 deaths everyday. Not only do these figures show a direct threat to the health of many families and children, but they also underscore how widespread the virus and accompanying stress has become.

CHI is adding reinforcements to its relief efforts with vaccine facilitation programs, hospital bill relief, oxygen and medicines, medical care and treatments in some of the hardest-to-reach and most impoverished communities in Bhuj, Bhopal, Jodhpur, Kolkata, Bangalore, Mumbai, Pune, Jammu and Hyderabad. We stand in solidarity with all of our programs during this devastating time and are committed to keeping programs nimble and adaptive as needs change.

Our Areas of Focus

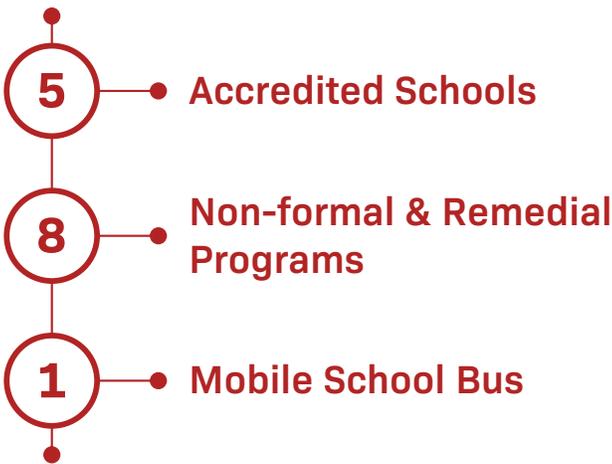

Area of Focus: Education

Our goal is to provide programming that holistically addresses the needs that prevent children from accessing education and achieving their dreams.

From day-care centers to mobile schools, from accredited schools to remedial education, our programs ensure that children get in school, stay there and see the future they deserve.

This year, amid immense challenges, we banded together to help staff and teachers launch virtual classes for a student population lacking connectivity, resulting in over 310,000 remote learning sessions.

Teachers and staff created new and enhanced curriculum to keep students engaged online. Digital learning activities included coding, speech, poetry, English, and arts competitions.

CHI invested in trainings to build virtual teaching capacity empowering teachers with new methods and helping them master platforms and tools. Teachers also benefitted from expert-led workshops on student mental health.

In spite of COVID-19, CHI education programs persevered, as teachers worked with students and families via WhatsApp, Zoom, and Google Classroom. Virtual coaching and study groups supported student persistence and helped students at two CHI schools break standardized test records.

98%

of Participants Pass

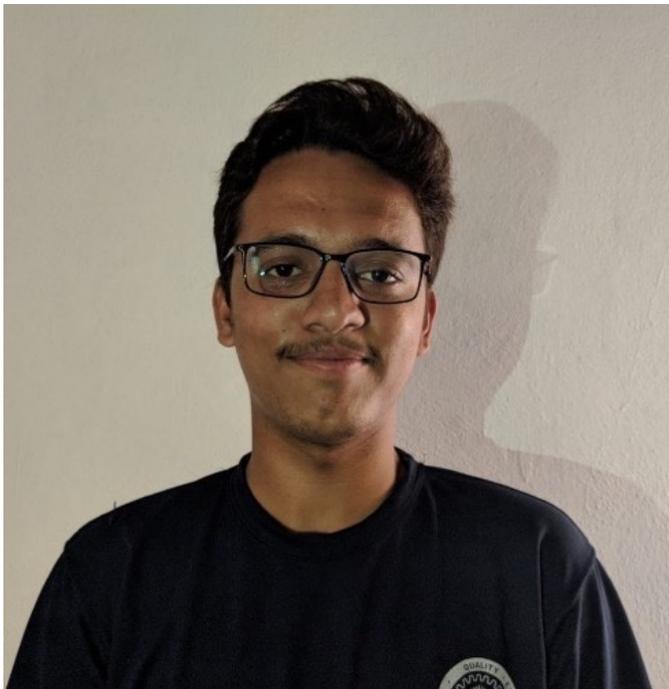

Partner Spotlight & Impact Stories

Our teachers are very proficient in sending out and receiving content of their teaching from the students and it has been very effective. The parents of the students are also involved in asking for homework and doubts if the child does not understand the work given to him or her. This parent child involvement is a special breakthrough.

CHI Hope Foundation Educational Institute

Bhuj

CHI Alumni & Scholarship Recipient Wins Admission To IIT

CHI Ekalavya Schools

CHI Accredited School | Hyderabad

Nenavath Vinod Kumar is surpassing his family's dreams for his education.

His father, a rickshaw driver, left school at age 10 and his mother soon after. After studying at CHI-Ekalavya School and with great determination, Vinod joined CBIT, a reputed engineering college in Hyderabad, made possible through a CHI Higher Education Scholarship. After studying diligently, he took the IIT-JEE entrance this year and cracked it, securing a seat in Indian Institute of Engineering Science and Technology, Shibpur which ranks in the top 20 colleges in India.

Ever-ambitious, Vinod is now pursuing M.Tech from the prestigious IITs.

Area of Focus: Career Building

In order to support youth and young adults in gaining economic independence, CHI invests in higher education scholarships, workforce training and skill attainment.

Career building is woven throughout all of our education programs—from accredited schools to non-formal education—as well as our community initiatives, and includes:

● **English Language**

● **Technological & Vocational Skills**

● **Nursing & Medical Support**

In 2020, like all of our programs, career building shifted online in order to adapt to lockdowns.

CHI accredited schools enhanced curriculum with career exposure and skills learning, including workshops that brought local professionals into virtual classrooms to model careers in IT.

Skills attainment programming empowered women in both rural and urban settings through trainings in Mehendi, embroidery, and stitching. Participants were supported in setting up their microbusinesses in the local community and at area celebrations.

All CHI students were trained to produce PPE including protective masks and given materials to launch their own production.

Partner Spotlight & Impact Stories

The mask making we started at Asha Kendra gave the women a means to not only help their community but to help themselves. Now their work is being scaled throughout the country to CHI's other programs in Bhopal and Delhi.

**CHI-UJAS Asha Kendra
Jodhpur**

**Education Helps
Priyanka Find
Employment Outside
of Her Slum**

CHI Prayas Cradle-to-Career Program – New Delhi, India

Special Initiative | New Delhi

Priyanka and her family live in a New Delhi slum. With very little income coming into the home, the family struggled to make ends meet while affording basic treatment for her mother's critical kidney disease.

Priyanka began attending classes at CHI Prayas: first, computer applications, then English speaking and life skills. Not only did the courses give Priyanka practical skills but they increased her confidence.

Now Priyanka is employed as an office assistant in a local company, bringing more resources into her household and creating a means to her own financial independence.

Area of Focus: Nutrition

Every child deserves to be well-nourished, no matter how precarious their economic or family circumstances are. After all, a child struggling with hunger has no chance at the educational achievement we wish for them.

In response to widespread malnutrition, our programs provide critical support to children and families:

● **Midday Meals & Emergency Food Kits**

● **Vitamins & Boosters**

● **Breastfeeding & Infant Nutrition**

In 2020, we are proud to have increased our nutrition support at a time when our projects needed it the most: 900,000 meals were delivered to those in need—almost double that of a typical year.

BMI Increase Program provides nutrition to rural children, significantly reducing future health issues. Children received daily snacks including roasted bajra, soybeans, and high protein grains; gained an average of 1.2 kilograms per year.

At-risk mothers benefitted from healthy meals and vitamins, as well as prenatal care, nutrition, and breastfeeding counseling.

School gardens teach students about the value of a healthy and varied diet, while also renewing their communities in rural villages and urban slums.

CHI's COVID-19 response prevented hunger with families and children in both India and the US, including families impacted by Covid in Hicksville and Queens. Students were provided with extra meals, PPE, and sanitizers.

Weight Gain Program Helps Increase Academic Achievement & General Health

CHI Mobile Medical Unit

Special Initiative | Karjat

For 10-year-old Ankita, one of four girls, having food on the table was not an everyday sight.

After her first year in the weight gain program, Ankita's height increased by 5 centimeters, compared to 4 in the previous year; and her weight increased by 5 kilograms as compared to 3.1 in the previous year. Now, Ankita is better able to focus on school and has shown increases in her academic work, attention span and listening skills.

“

CHI stands out for its commitment to building long lasting partnerships with the grassroots projects and schools it supports, strengthening its impact on the ground and carrying out its mission year after year.

Tinku Jain
Media Personality
Advisory Board Member, CHI

Area of Focus: Medical Care

For many children in the communities where we work, poor health and preventable illness are part of daily life. In response, we bring critical medical care to families and children with no access to treatment or care, and little access to important health information.

• Mobile Medical Units

• Health Screening Camps

• Telemedicine

• Surgeries & Treatments

This year emergency services were often suspended, so CHI programs stepped in with critical vision treatments and door-to-door doctor visits.

Despite lockdown, medical treatments, emergency services & medicines persisted reaching more than 5,000 rural residents. Virtual workshops discussed social distancing, hand washing, and diet.

Pediatric surgeries treated blindness, cataracts and other illnesses, bringing life-changing interventions to children.

Virtual workshops and supplies distribution strengthen female health and hygiene for young women and girls, in partnership with Academy of Pediatrics, Karjat Medical Association, and the Taluka Health Office.

Then PM's #FITIndia movement kicked off at a CHI School with a sports event for 50 Jammu students.

Rural Screening Camp Helps Apeksha Restore Her Sight

CHI Sight for the Sightless

Special Initiative | Pune

Apeksha began to lose her sight at age three. By age eight, she was blind in one eye and struggled to study and help at home. Apeksha's mother, a widow employed as a cook and cleaner, could not afford her daughter's treatment and accepted her partial blindness as part of life.

But, when Sight for Sightless held an eye screening camp in their village, they learned that Apeksha's cataract was treatable.

Not long after, the program provided a vision-saving surgery and treatment and her sight returned. Today, she is able to study in school and confidently interact with her peers.

“

Our involvement with CHI has been a source of immense pleasure for us. CHI has offered us a platform to contribute to the educational wellbeing and health of India's youth, with the expectation that our contribution will be well spent. We have sponsored a group of high achieving girls and boys for their higher education, which we hope will have a ripple effect on their families and the community at large.

Drs. Bhushan & Santosh Khashu

Area of Focus: Mental Health & Well-being

Since our founding, CHI programs have supported the mental health and well-being of everyone with whom we have worked through including the following components.

● **Social Work & Virtual Counseling Services**

● **Council Leadership**

● **Arts, Culture & Mindfulness**

CHI launched a Mental Health Council with leading experts to guide innovation. The council is led by President Dr. Dina Pahlajani (Northwell Healthcare System); and includes Dr. Umesh Gidwani (Mount Sinai Medical Center), Kavita Ramnani (Stanford Care Center), Anuja Khemka, MSW and 2020 Crains NY Notable in Healthcare, Reena Nandi, psychiatrist, and Prerna Shah, pediatric neurologist.

In partnership with Mpower and The Aditya Birla Education Trust, mental health supports are being scaled to refugee children and families. Psychologists and psychiatrists set up a counseling cell to train residents in coping techniques, common symptoms, and mental health awareness.

CHI students gather virtually for daily prayer, meditation and yoga as well as watercolor, crafts, and dance. Programs offered a safe hour of recreation for students during strict slum lockdowns.

Counseling, coaching and social work went online to help students cope with stress. Psychologists also held weekly mobile school workshops on seeking help and recognizing symptoms.

124,077

Hours of Counseling

After 10 Years Of Care, CHI Program Makes Communication Breakthrough For Student With Severe Cerebral Palsy

CHI-Shishur Sevay

Special Initiative | Kolkata

When Ganga came to Shishur Sevay, she was four years old and weighed just seven kilograms. Diagnosed with severe cerebral palsy, Ganga was non-verbal.

The staff tried different therapies but because Ganga couldn't control her hands or feet, they lost hope. When they learned of new eye-tracking technology, their faith was reignited.

They purchased the eye tracker and saw a sea-change in Ganga: she could suddenly communicate! Now she is learning and socializing right alongside her peers.

“

Throughout the pandemic, CHI stayed committed to lifting the whole community, reaching beyond the school walls to distribute warm blankets during the winter months, deliver emergency meals, and provide clothes and supplies to those in need.

Volunteer Engagement

Children's Hope 2, or CH2, is the next generation of CHI leaders and volunteer. As a group, they dedicate their time and skills to supporting CHI's local projects as well as raising critical support for projects in India. Children's Hope 3, or CH3, is our youngest volunteer cohort, made up of high school students dedicated to supporting local children and families. Throughout the year, their work was recognized by various agencies.

New York State Senator Kevin Thomas recognized CH3 support of first responders

Nassau County Citations honored CH3 holiday meal and gift donations

Community Service Certificate from the Hoboken Mayor's Office recognized food pantry support

- During the first wave of the pandemic, students delivered the snack packs to Mercy Hospital, NYU Winthrop Emergency Trauma Unit, Nassau County Police, Queens Hospital ICU, New York-Presbyterian and Island Harvest. A free dance class was held for 91 healthcare workers at Mt. Sinai Hospital.
- Critical PPE was donated to Elmhurst Hospital staff dealing with shortages
- Thanksgiving meals were collected and distributed to 200 families in 6 Nassau County shelters. In partnership with FeedingNYC, students delivered holiday meal bundles to 241 families.
- In partnership with Toys for Tots, students collected and distributed 375 gifts and 60 gift cards for families to use over the holidays.
